#### **OPERATIONS**

In fiscal 2006-07, the company's domestic turnover, in line with the general performance of the automobile industry, grew from Rs.4,217 million to Rs.4,809 million recording a growth of 14% over the previous year. The export turnover has increased tremendously from Rs.600 million to Rs.1,024 million registering a growth of 71%. The trend in the export of automobile products are encouraging and the company will continue to pursue its efforts to increase its export turnover during the current period.

During 2006-07, the profit before interest and depreciation has increased by 22%. The financial cost has increased due to hardening of interest rates and higher borrowings to meet increased Capex for new projects. Hence Profit After Tax before considering extra ordinary income has gone up by 19% only.

#### **GREEN FIELD PROJECTS**

As informed in previous year's report, the company has set up a Plant in Pantnagar, Uttarakhand State. Commercial operations has commenced from April 2007, to meet the requirements of Bajaj Auto. The company is in the process of setting up another Plant in Pantnagar, to cater the needs of other OEM customers. It is expected to commence commercial operations from August 2007.

During the year, the company had opened representative Offices in USA and Germany and is also in the process of opening an office in Italy, to cater the needs of USA and Europe market.

At the moment, we are exporting nearly USD One Million worth of fully finished Instrument Clusters and Speed Sensors every month to Iran. The duty for import into Iran is 25% for fully finished products. To grow the business, it would be better to set up an Assembly Unit in Iran with the major critical components to be supplied by us from India. As the import duty for components is only 10%, our products for the Iran Unit will be more competitive. Therefore during 2007-08, your company has decided to set up a Joint Venture Company in Iran with Nava Khodro Plastic Company, our present Marketing Partner. Pricol and Nava Khodro will hold 50% each in the share capital of the new Joint Venture Company. The commercial production is expected to commence in the quarter Jan-Mar'08.

#### SUBSIDIARY COMPANIES

PT PRICOL SURYA, a wholly owned subsidiary at Indonesia, which was established for manufacturing two wheeler products to cater the requirements of OEM's in ASEAN, commenced commercial production in April 2007.

In 2006-07, English Tools and Castings Limited had become wholly owned subsidiary of the company subsequent to the purchase of remaining 30% shares from its promoters. English Tools and Castings Limited had applied to the Honourable High Court, Chennai for restructuring its share capital by way of reduction of capital, from Rs.276.989 million to Rs.79.337 million to reflect the true value of its assets. The operations have been turned around from a turnover of Rs.169.790 million and loss of Rs.5.424 million for the year ended March 2006, to a turnover of Rs.231.486 million and profit of Rs.5.613 million for the year ended March 2007.

#### **OUTLOOK**

The growth in automotive industry was quite robust, considering continued economic growth, good monsoon and continued need for transport. The entry of global OEMs, making India as their manufacturing base, has given a big boost to the industry. Rising exports of Indian-made vehicles has also emerged as a key component of growth. The growth expected in the automobile industry will give a fillip to the auto component sector. The Indian auto component industry is poised for good growth.

#### OPPORTUNITIES, CHALLENGES, RISKS & CONCERNS

Larger opportunities for exports will be the thrust area of the Industry. The continued outsourcing of automotive components from vehicle manufacturers in USA and Europe to low cost manufacturing countries like India gives abundant opportunities for cost competitive companies like us.

Relaxations provided by the Government to the automobile industry such as reduction of duty on raw materials, the setting up of National Automotive Testing and R & D Infrastructure Project (NATRIP) and finalization of Automotive Mission Plan (AMP) would provide a boost to the sector in an enormous way.

The major challenge that the auto industry is presently facing is with respect to its capabilities to innovate and upgrade in order to remain competitive in the international market. Further, the industry has to develop a supply base with emphasis on lower costs and economies of scale, develop technical and human capabilities, overcome infra-structural bottlenecks, stimulate domestic demand and exploit export and international business opportunities.

The Company is exposed to a variety of risks caused by steep rise in interest rate, price increase in input materials, currency fluctuations, change in models and design, low volumes, pricing pressure, stiff competition etc. In order to reduce the risk, the Company has diversified into manufacture of a wide range of products for the entire spectrum of auto industry. The fluctuations in exchange rates and the impact of increased interest rate will have an adverse effect on the profitability of the Company. The Company will attempt to soften the impact of risks through continuous monitoring, timely action and control measures.
