SECTOR REVIEW

PRICOL LIMITED
Passion to Excel

Automotive Industry

- With the advent of COVID-10 Pandemic, the world economy suffered a great deal and auto sector was not left untouched. Bearing the brunt of the strict worldwide lockdown the auto sector witnessed unprecedented slowdown which consequently led to salary cuts and ultimately layoffs.
- After a year today while many countries have opened up although either partially or with strict guidelines in order to prevent the spread of COVID-19; India is witnessing the second wave which has proved to be more dangerous than the first one wherein the no of deaths are very high as compared to the first one.
- OEMs have decided either to shut down their plants for a few days or have opted to extend their annual maintenance which ultimately results in production loss. Furthermore, on the sales front as well the picture looks grim as the dealerships are closed and no festive season sales; which normally is the case. So, although the actual reported numbers might show growth on a Y-o-Y basis this is mainly due to the favorable base effect.
- The vaccination drive may provide some cushion to the spread of COVID-19; however if the paucity of vaccine persists and the vaccination drives gets stretched this shall have repercussions on the auto industry.
- All the above factors leads to downward revision of estimates of the figures.

Source: ICRA May 2021 Report

Automotive Industry

➤ Shortage of Semiconductors

Global resurgence of the automotive industry and consumer electronics has caused a shortage of crucial semiconductors that has impacted raw material availability and trend is expected to continue.

➤ Steel

Steel Prices are witnessing an up cycle and are at an all time high which has significantly increased the input cost for the auto sector. Furthermore the prices are not likely to soften in the near term

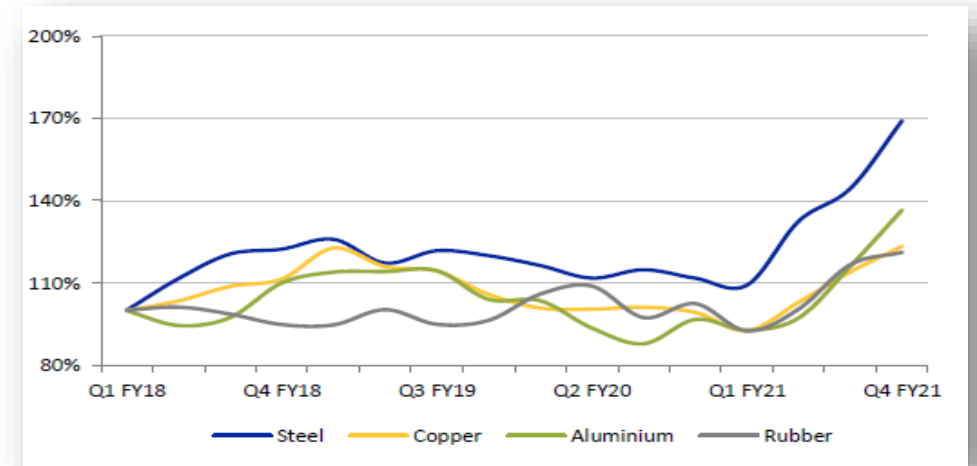

➤ Aluminum

The aluminum prices are also at a multi-year high adding to the raw material cost incurred. These levels are expected to sustain and are unlikely to come down in the near term

➤ Copper

Even the copper prices which are trading at current highs are expected to sustain for the next few months before softening; FY2022 to be at a multi-year high.

Commodity Price Trend in the Last Four Years

Source: ACMA April 2021 and ICRA May 2021 Report

Automotive Industry

- On the bright side, with two consecutive years of double digit decline, the domestic automotive industry, had been reporting healthy sequential recovery trends over the second half of FY2021, post relaxation of the lockdown-related restrictions
- Strong sequential improvement in M&HCV sales to continue, driven by rise in e-commerce, agriculture, infrastructure, and mining activities. We expect the strongest recovery in the CV segment in FY2022 and FY2023, driven by improved economic activities, low interest rate regime, and better financing availability
- Post the relaxation of the restrictions we again expect the demand for 2 Wheelers, we which cater to a large extent, to witness a pent up demand as consumers will try to avoid public transport
- Auto and auto ancillary stocks have undergone a healthy retracement after a strong up move during CY20. Most of the stocks have held their key support despite a host of negative news flow owing to surging Covid-19 cases in India, thereby offering favorable risk reward.

Source: ICRA May 2021 Report

Automobile Industry

- Commercial Vehicle segment to witness growth optically better due to favorable base effect after two years of sharp contraction
- As far as the Tractor Industry is concerned a normal monsoon, higher MSP, supported by enhancement government support and incentive schemes and a favorable crop outlook, shall be beneficial to the sales in this segment
- Sales estimates of Passenger Vehicles, Two wheelers, Tractors and Commercial Vehicles are expected to post an average of 15% over FY22

Source: ICRA May 2021 Report

PRICOL LIMITED
Passion to Excel

Two Wheelers

➤ Estimates

The estimates for the two wheeler segment have been revised upwards by 10-15%

➤ Growth Drivers

- Preference for personal mobility in order to avoid public transport
- Reinstatement of salary cuts and increments
- Buoyant export demand

➤ Challenges

- Spread of pandemic to semi-urban and rural areas
- High inventory levels at dealerships
- Liquidity Constraints at macro level
- Rising raw material costs

Industry Market – Growth Estimates

Source: ICRA May 2021 Report

Passenger Vehicles

Estimates

- Estimates revised downwards from 22-25% to 17-20%

Growth Driver

- Preference for personal mobility due to continued need for social distancing
- Steady agri cash flows to aid rural demand
- Adequate financing availability

Challenges

- Temporary extended shut down of production at OEM level
- Disruption of the entire value chain of major industries in India, consequently affecting production of auto spares
- Reduced consumer demand owing to strict travel restrictions

Passenger Vehicle Industry Market -Growth Estimates

Source: ICRA May 2021 Report

Commercial Vehicles

➤ Estimates

- Estimates for commercial vehicles are revised downward by 10-15%

➤ Growth Driver

- Favorable base effect after two years of sharp contraction
- Demand from infrastructure vertical for medium & heavy commercial vehicles (M&HCVs) remains strong
- Increased last-mile transportation demand to support LCV (Truck)

➤ Challenges

- Hampered ecommerce sales, financing challenges and spread of pandemic to rural & semi urban areas
- Wipeout of seasonal demand from school, Continued work from home culture and weak tourism prospects

CV Industry Market -Growth Estimates

Source: ICRA May 2021 Report

Tractors

➤ Estimates

The estimates for the Tractors segment have been revised downwards to 1-4% from 4-6%

➤ Growth Drivers

- Normal Monsoon
- Favourable crop outlook
- Higher MSP Prices
- Ample finance available

➤ Challenges

- Spread of pandemic to semi-urban and rural areas
- High base impact-FY2021 ended with the highest ever industry sales
- Unfavourable monsoon

Tractor Industry Market -Growth Estimates

The contents are intended but not guaranteed to be correct, complete or absolutely accurate. This presentation also contains forward-looking statements based on the currently held beliefs and assumptions of the Management of the Company, which are expressed in good faith and in their opinion are reasonable.

Forward looking statements involve known and unknown risks, contingencies, uncertainties, market conditions and other factors which may cause the actual results, financial condition, performance or achievements of the Company or industry results to differ materially from the results, financial condition, performance or achievements expressed or implied by such forward-looking statements. The Company disclaims any obligation or liability to any person for any loss or damage caused by errors or omissions whether arising from negligence, accident or any other cause.

Recipients of this presentation are not to construe its contents or any prior or subsequent communications from or with the Company or its representatives as investment advice. In addition this presentation does not purport to be all inclusive or to contain all the information that may be required to make a full analysis of the Company and of the relevance and adequacy of the information and should make such other investigations as they deem necessary.
